

WE CARE ABOUT YOUR
Skin, Tan and You!

Indoor tanning allows you to maintain a healthy image without many of the discomforts of outdoor tanning. Here are some helpful tips to ensure your tanning success.

- TIP 1** Always use an indoor tanning lotion. This will increase our tanning results dramatically and care for your skin by helping it retain vital moisture lost in tanning. We provide a full line of products for your skin.
- TIP 2** Always wear FDA, Salon Approved protective eye wear. Merely closing you eyes or laying a towel on your face is not enough! Your eyelids cannot fully block UV light. Your eyes will be with you forever. Invest in some protective eyewear to take care of them.
- TIP 3** Take it slow. Tanning is not a race. Overexposure will hinder the results you want to see, so exercise moderation. Our tanning consultant is certified to administer session time suitable for your skin type, and will assist you in determining a competent exposure schedule.
